Please replace the section heading on page 1 at line 12 to read as follows:

-- ~~PRIOR ART~~Description of Related Art --

Please replace the paragraph on page 4, beginning at line 9, with the following replacement paragraph:

-- The ~~object of the present~~ invention is to ~~provide~~ a coaxial cable which is suitable in particular for extra-high frequencies in the range between 1 GHz and 65 GHz and, while at the same time having a simple structure, is distinguished by consistently good transmission properties even under recurrent mechanical loading.--

Please replace the paragraph on page 4, beginning at line 16, with the following replacement paragraph:

-- ~~The object is achieved by the features of claim 1 in their entirety. The essence of the present invention is to provide~~includes additional stabilizing means within the coaxial cable for the mechanical and or electrical stabilization of the first outer conductor. These additional stabilizing means allow reliable avoidance of a deterioration in the shielding properties of the wound (bound) first outer conductor on account of mechanical loading of the cable. --

Please replace the section heading on page 6, at line 5, with the following section heading:

-- ~~BRIEF EXPLANATION~~DESCRIPTION OF THE FIGURESDRAWINGS --

Please replace the paragraph on page 6, beginning at line 7, with the following replacement paragraph:
